

## Regional Resource Centre, Kolkata

The Eastern and North-Eastern states of India have unique economic, political, cultural and geographical features. Majority of rural population from the region are spread out in hilly terrain with little or no access to facilities and services. These factors have a direct impact on the lives of persons with disabilities in this region. As a response to this need, Mobility India's Regional Resource centre was established in September 1998.

Filling gaps...  
...Rehabilitation  
Service  
on the Eastern  
Periphery

### WEST BENGAL
